August 2016

To whom it may concern:

CORVI PVC is a company that is a part of GRUPO CORRIPIO and GRUPO VICINI in the Dominican Republic. The company has 15 years of experience in the manufacture and commercialization of PVC pipes and fittings for water, drainage and bathrooms. It has one of the most modern plants in the Caribbean region and complies with all international regulations and certifications to satisfy every single one of the requirements of each of our different markets.

As we continue improving the quality of our processes and optimizing our productivity and level of service, we decided to collaborate with **London Consulting Group's** team to carry out the "**Optimization of Production Programming and Floor Control Processes**" which took place from March to August 2016.

Some of the achievements reached during the project were as follows:

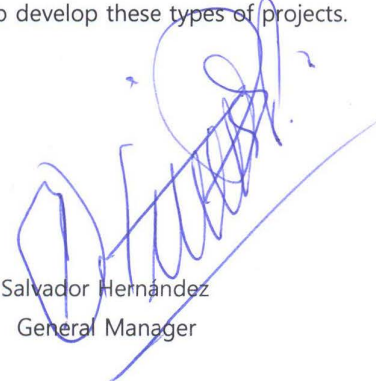

- **10 percentage points** of improvement in extrusion (OEE) productivity.
- **21 percentage points** of improvement in injection (OEE) productivity.

Additionally, we developed tools that improve the efficiency of the processes, such as:

- Production programming and inventory coverage analysis tools.
- Utilization of TVQ (Time, Velocity and Quality) in extrusion and injection.
- Implementation of the governance model and the root cause analysis in order to define and establish action plans.

The economic benefits obtained during the **Process Optimization** project showed a return on investment to this date of **2 to 1** and an annual projection of over **4 to 1**. Based on the above, CORVI PVC is pleased to recommend London Consulting Group as a professional and committed company with a highly effective methodology to develop these types of projects.

Sincerely,

  
Salvador Hernández  
General Manager

  
Horacio Guzmán  
Plant Manager
